ABNORMAL & PROJECT CARGO

Designing advanced project logistics requires flexibility, specific knowledge and a true passion to find solutions to the challenges that arise. Our people have the skills and the determination to do whatever is needed to get the job executed.

Our project cargo client base include top companies in the Construction, oil & gas, energy, power plants, Petrochemical etc. where turn-key projects are designed and delivered.

Our staff are highly qualified to design, plan and implement complex logistics projects such as:

- Heavy Load and Oversized
- Multimodal Transport Design
- Site Survey
- Turn-Key Projects
- Base and Warehouse Project Management

STORAGE FACILITIES

Open storage facilities played very vital role for handling oversized and heavy projects equipment. It is almost impossible to handle break-bulk and heavy consignments just after completion of customs clearance at seaport (s).

We managed fully equipped storage facilities suitable for temporary storage of all types of break-bulk, heavy consignments and containerized shipments prior delivery to jobsite. We maintained large inventory of various types of stainless steel (stools and beams) being used for temporary storage purpose by using jack down operation of modular lines systems.

WAREHOUSE MANAGEMENT

Our warehousing services improve efficiency of inventory and speed up your response to changing customer demand. Our experts create, implement and operate flexible solutions tailored to your business. Our Security, safety and inventory accuracy are second to none to protect your brand and products.
